DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species A, Fig. 1, claims 1,2,32,33 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Information Disclosure Statement

2. If applicant is aware of any relevant prior art, he/she requested to cite it on form PTO-1449 in accordance with the guidelines set forth in M.P.E.P.

609.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

4. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.

Art Unit: 2826

(c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.

(d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

(e) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(f) BRIEF SUMMARY OF THE INVENTION.

(g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(h) DETAILED DESCRIPTION OF THE INVENTION.

(i) CLAIM OR CLAIMS (commencing on a separate sheet).

(j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing"

is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,2,33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 10-13, “a first metal trace formed between a first saw street and a first semiconductor circuit; and a second metal trace formed between the first saw street and a second semiconductor circuit” is unclear as to whether it is being referred a first metal trace formed in a first saw street and a second metal trace formed in the first saw street wherein the first saw street formed between the first semiconductor circuit and second semiconductor circuit.

In claim 33, lines 2,3, “a first metal trace formed between a first saw street and a first semiconductor circuit” is unclear as to whether it is being referred a first metal trace formed in a first saw street wherein the first saw street formed between the first semiconductor circuit and second semiconductor circuit.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,32,33 are rejected under 35 U.S.C. 102(e) as being anticipated by Lunde (6,630,685).

With regard to claims 1,2,32,33 Lunde discloses a semiconductor wafer 40' comprising: a plurality of semiconductor circuit dies 26' formed on the semiconductor wafer 40', each semiconductor circuit die 26' having a pair of first sides 26A that are parallel to each other, and a pair of second sides 26B that are parallel to each other and perpendicular to the pair of first sides 26A; a plurality of first saw streets (FS) that run parallel to the first sides 26A between a number of the semiconductor circuit dies 26'; a plurality of second saw streets (SS) that run parallel to the second sides 26B between a number of the semiconductor circuit dies 26'; a first metal trace 46A formed in a first saw street (FS) and a second metal trace 46B formed in the first saw street (FS) wherein the first saw street (FS) formed between the first semiconductor circuit die and second semiconductor circuit die; and wherein the first and second metal traces (46A,46B) extend across the wafer 40'. (Note attachment #1, lines 21-23, column 7, fig. 5 of Lunde).
